DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Rodriguez (6,666,676), which shows all of the claimed limitations. Rodriguez shows a combustion control device including, among other things, a circuit for voltage backup CRV, connected to the feeding voltage VCC, of the clock 24, in order to store sufficient energy when there is a power failure and to be able to activate a relay operating circuit (CMR); the relay operating circuit (CMR) being utilized to open or close the thermocouple 18; a control signal conditioning circuit (CASC) receives the controlled signal that arrives to the micro controller 64, in order to control the relay operating circuit (CMR) in a logical manner.
